

Press Release

MAAG Group to introduce small footprint Pulverizer

Oberglatt, Switzerland, October 16, 2019 – MAAG Group is adding the “REX POWDER” to its line of pulverizer systems. The new system will be introduced at K-Show 2019 and provides customers a new cost and space efficient option for pulverizing testing and small scale production from 50 kg/hr to 200 kg/hr.

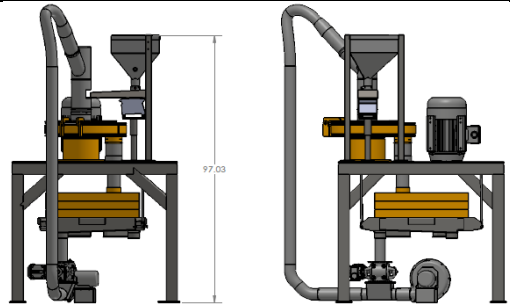

The small footprint and modular design of the unit allows it to fit into a standard shipping container – it is built for versatility and flexibility. Customers can use it for test runs or production runs, the ability for easy shipping allows for movement of the equipment to balance capacities at different plant locations if required.

This versatile pulverizer can process a wide variety of applications where top-quality sample powders or small scale production runs are required. The unit can handle a wide variety of materials – from engineered resins, rubber, adhesives, recycled materials to pharmaceuticals as well as food grades.

The REX POWDER specifications provide a range of production rates from 50kg/hr to 200kg/hr per hour.

- 22 KW or 30 HP
- 4 deck sifters (particle size chosen by customer)
- Quick clean sifter **optional**
- Embedded controller (allowing for remote access for maintenance and troubleshooting)
- Spring adjusting gap
- New air sweep system

“With the small footprint, modular construction and faster deliveries, this system provides our customers an excellent system for quick capacity expansion or as a trial system”, says Jim Surma, Product Manager, Pulverizer of MAAG Group Americas. “Customers don’t have to make any compromises in quality and serviceability, the systems feature our patented replaceable discs that make minimize downtime and costs.”
